

Project Title: TinDog	
Start Date: 1/9/2023	End Date: 5/5/2023
Team Members: Dfamilya Samatova	
Project Sponsor: None	
Customer: None	
Users: None	
Purpose (Problem or opportunity addressed by the project): Everybody, including dog owners, secluded themselves as a result of the COVID-19. Since we care about the welfare of our pets, TinDog can assist a dog owner in finding the ideal match for their pets so that they do not feel lonely.	
Goals and Objectives: <ol style="list-style-type: none"> Easy use to find a match for your pet Chat with your matches in a form of a messenger Make new friends 	
Schedule Information (Major milestones and deliverables): <ol style="list-style-type: none"> Design/Modelling is finished by end of January 2023 Front-End (HTML, CSS, JavaScript) development is finished by March 2023 Back-End/Database is finished by April 2023 Final product by May 2023 	
Financial Information (Cost estimate and budget information): None	
Approach: Iterative, Agile Project Management	
Constraints: No mobile app is available; The maps might not be working for every user.	
Assumptions: The website will function just like any other dating website	
Success Criteria: <ul style="list-style-type: none"> Well-functioning website Easy to use Fit into timeframe 	

Scope: The website will have multiple pages. Users will be asked to set up their profiles. Users will be able to chat with their matches. Accessibility through Desktop.

The website won't have an access tool via mobiles/tablets.

Risks and obstacles to success: Lack of information. No experience in React and database.

Project Priorities and degrees of freedom: No bugs occur. 50% The main purpose must be accomplished + fitting in the timeframe.
